

Press Release

ILSI America LLC has formed an alliance with TeraSync Ltd to market and support their Timing and Synchronization Solutions in North America and China

ILSI and TeraSync have reached an agreement for ILSI to exclusively market and support TeraSync's Timing and Network Synchronization Products. The product line includes GPS timing modules and synchronization systems for WiMAX Base Stations, IEEE-1588, SyncE, LTE Base Stations Micro and Macro Base Station, SONET SDH (TDM), Stratum 2, 3, 3E and TDM over Packet.

TeraSync designs and manufactures IEEE 802-16D/E, WiMAX 4 and 4.5 Generation and LTE Base stations solution, premier Stratum 2, 3, 3E, SEC and SMC solutions for traditional TDM networks and for advanced networks such as TDM over IP/Ethernet, BITS/SSU Interface Modules and Small Line Cards. TeraSync products comply with universal standards institutes such as IEEE, ANSI, ETSI, UMTS, Telcordia and others, and are an essential building block for telecommunication infrastructure products.

The combined ILSI America and TeraSync product lines will offer our customers complete frequency control and timing solutions.

ILSI America is a leading supplier of Frequency Control Products - quartz crystals, XOs (clock oscillators), TCXOs (temperature compensated oscillators), VCXOs (voltage controlled crystal oscillators), and TCVCXOs (temperature compensated voltage controlled oscillators).
