Press release: Comchip New ISO/TS Certification

NAC congratulates Comchip on the completion of the ISO/TS 16949:2009 certification process for Design and Manufacturing of Diodes.

Comchip Technology Corp. is the SMD Diode Specialist. With innovative design and leading edge manufacturing process, Comchip was the first to introduce RoHS compliant diodes in 2001. Since then, we have expanded product offerings to include industry leading RoHS and Tin-Free flat chip packages in SOD-923F, SOD-723F, SOD-523F, and SOD-323F, as well as complex 8 pin and 6 pin arrays in SOT-383F and SOT-363F packages.

Comchip's products are synonymous with quality and dependability at competitive pricing, and their manufacturing and quality control processes fully complies with ISO 9001 and ISO 140001 standards. The addition of the ISO/TS 16949:2009 certification is yet another reason to look to Comchip and NAC for your Diode needs.
