New high efficiency higher power LED driver

The KLW35 series is newly designed for higher power LED which needs AC input and constant current drivers. It is designed to a number of safety standards. Lighting strike and surge refer to IEC61000 Level 4, water and dust proof refer to IP67. It also features high efficiency 87% minimum, power factor up to 0.94. Its lead wire package facilitates the installation. Metal case not only provides better shielding and heat conduct than metal case, but also provide quality looking. This is a high quality and cost effective AC input LED driver.

This series can be widely used in indoor and outdoor led lighting applications such as yard, road, building, factory, shop and underground parking lot lighting

Product Features:

- Wide range AC input
- Constant current output
- Under voltage protection, over voltage protection, short circuit protection
- High efficiency
- High power factor
- Dust & water proof level
- Lighting proof
- Metal case

Datasheet:

KLW35-2B032M
