MORNSUN®

5W, AC/DC converter

FEATURES

- Ultra-wide 85 305VAC and 70 430VDC input voltage range
- Accepts AC or DC input (dual-use of same terminal)
- Operating ambient temperature range -40°C ~ +85°C
- Compact size, high power density
- Low power consumption, green power
- Output short circuit, over-current protection
- Over-voltage class II
- IEC/EN/UL62368, EN60335 safety approval

LS05-13BxxSR2S(-F) series is one of Mornsun's highly efficient green power AC-DC Converter series. They feature ultra-wide wide input range accepting either AC or DC voltage, high efficiency, low power consumption and Class II reinforced insulation. All models are particularly suitable for industrial control, electric power, instrumentation and smart home type applications which do not have high levels of EMC requirement. We recommend using external components as shown in design reference for enhanced EMC performance in harsh environmental conditions.

Selection (Suide				
Certification	Part No.	Output Power	Nominal Output Voltage and Current (Vo/Io)	Efficiency at 230VAC (%) Typ.	Capacitive Load (µF) Max.
	LS05-13B03SR2S(-F)*	3.3W	3.3V/1000mA	67	2200
	LS05-13B05SR2S(-F)		5V/1000mA	74	1500
	LS05-13B09SR2S(-F)		9V/560mA	75	680
CE/UL/CB	E/UL/CB LS05-13B12SR2S(-F)	5W	12V/420mA	77	470
	LS05-13B15SR2S(-F)	1	15V/340mV	77	330
	LS05-13B24SR2S(-F)	1	24V/210mA	79	100

Note: 1) *An "-F" suffix designates horizontal package vs. standard vertical mounting.

(2) If the product is used in a severe vibration application, it needs to be glued and fixed.

Product Characteristic Curve

Note:

① With an AC input between 85 -110VAC/277-305VAC and a DC input between 70 - 150VDC/390 - 430VDC, the output power must be derated as per temperature derating curves;

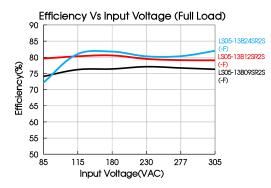

2 This product is suitable for applications using natural air cooling; for applications in closed environment please consult factory or one of our FAE.

LS05-13B24SR2S(-F)	-		220uF/35V				

Note:

1. C1: input capacitors, C2: output storage capacitors, they must be connected externally.

2. We recommend using an electrolytic capacitor with high frequency and low ESR rating for C3 (refer to manufacture's datasheet). Combined with C2, L1, they form a pi-type filter circuit. Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C4 is a ceramic capacitor, used for filtering high frequency noise. A suppressor diode (TVS) is a recommended to protect the application in case of a converter failure and specification should be 1.2 times of the output voltage.

Note:

- 1. For additional information on Product Packaging please refer to <u>www.mornsun-power.com</u>. Packaging bag number: 58220084(LS05-13BxxSR2S); 58220025(LS05-13BxxSR2S-F);
- 2. External electrolytic capacitors are required to modules, more details refer to typical applications;
- 3. This part is open frame, at least 6.4mm safety distance between the primary and secondary external components of the module is needed to meet the safety requirement;
- 4. Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75%, nominal input voltage (115V and 230V) and rated output load;
- 5. In order to increase the conversion efficiency of the product with light load in the design, the product will have audio noise when it is operating, but don't affect the product's reliability and performance;
- 6. All index testing methods in this datasheet are based on our company corporate standards;
- 7. We can provide product customization service, please contact our technicians directly for specific information;
- 8. Products are related to laws and regulations: see "Features" and "EMC";
- 9. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units.
