### High Temperature 1200V/10A Silicon Carbide Schottky Diode

---

#### **General description**

CHT-IO-1210 high temperature 1200V/10A Silicon Carbide Schottky Diode is designed to achieve high performance in an extremely wide temperature range: typical operation temperature goes from -55°C to 210°C while keeping leakage current low.

This device is packaged in a hermetically sealed TO-257 metal package especially designed and qualified to sustain high temperature and power cycling. This package offers high voltage isolation between pins and with respect to the case, facilitating the mounting on a heatsink.

The diode can be used in a variety of applications, including rectification, free-wheeling, clamping and general purpose.

#### **Features**

- Specified from **-55 to +210°C** (Tj)
- Reverse voltage:  **$V_R = 1200V$**  (max)
- Forward current:  **$I_F = 10A$**  (max @ 210°C (Tj) and  $V_F = 1.7V$ )
- Forward voltage:  
 **$V_F=1.2V$**  (typ. @ 25°C (Tj) and  $I_F=10A$ )
- Junction capacitance:  
 **$C_j=93pF$**  (typ. @  $V_R = 400V$ )
- Hermetically sealed TO-257 metal package
- Pins electrically isolated from the case

#### **Applications**

- Free Wheeling
- Full bridge rectification
- Power supplies
- General purpose diode
