

Harvatek High Power LED Datasheet

Model No: HT-CT90

Official Product	HT Part No. HT- CT90	Your Part No.	Data Sheet No.	
Tentative Product	*******	*****		
	ect to changes for improvement . Proprietary data, drawings, and rights reserved.	Aug-04, 2017	Version of 1.4	Page 1/19

Dimension: 27.35x27.35 mm

• Typical Im: CW 7900 @1400 mA

WW 7400

Color Temperature : CW/NW/WW

• CRI: CW>80 WW>80

• High CRI can be available

Thermal Resistance : 0.41°C/W

DISCLAIMER

HARVATEK reserves the right to make changes without further notice to any products herein to improve reliability, function or design. HARVATEK does not assume any liability arising out of the application or use of any product or circuit described herein; neither does it convey any license under its patent rights, nor the rights of others.

Life Support Policy

HARVATEK's products are not authorized for use as critical components in life support devices or systems without the express written approval of the President of HARVATEK or HARVATEK INTERNATIONAL. As used herein:

- 1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
- 2. A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

Official Product	HT Part No. HT- CT90	Your Part No.	Data Sheet No.

Product Specification

	Specification	Material	Quantity
Dimension	27.35x27.35x1.95 mm	Ceramic Substrate	
LES	23 mm		
V _F	Typical 39 V @ 1400 mA/Ta = 25 °C		
Resin		Silicone	
Tray	304 mm × 195 mm		30 pcs per tray
Label	HT standard	Paper	
Carton	HT standard	Paper	Non-specified

Others:

Each immediate box consists of 15 trays. The 15 trays may not necessarily have the same lot number or the same bin combinations of Iv, λ_D and Vf. Each reel has a label identifying its specification; the immediate box consists of a product label as well.

Note: This is shipped test conditions

*Remarks: This product should be operated in forward bias. If a reverse voltage is continuously applied to the product, such operation can cause migration resulting in LED damage.

ATTENTION: Electric Static Discharge (ESD) protection

The symbol shown on the page herein to introduce 'Electro-Optical Characteristics'. ESD protection for GaP and AlGaAs based chips is still necessary even though they are safe in low static-electric discharge. Parts built with AlInGaP, GaN, or/and InGaN based chips

are **STATIC SENSITIVE devices**. ESD protection has to considered and taken in the initial design stage.

If manual work/process is needed, please ensure the device is well protected from ESD during all the process.

Official Product	HT Part No. HT- CT90	Your Part No.	Data Sheet No.

Electro-Optical Absolute Maximum Ratings

 $(T_a = 25^{\circ}C)$

Parameter	Rating	Unit	Conditions
DC Forward Current*1	1560	mA	-
LED junction Temperature	≦120	°C	-
Operating Temperature	-30~+85	°C	-
Storage Temperature	-40~+100	°C	-
Soldering Temperature	260	°C	For 5 sec. Max.

^{*1:} Proper current derating must be observed to maintain junction temperature below the maximum.

Electrical Characteristics

 $(T_a = 25^{\circ}C)$

Parameter	Symbol	Min.	TYP.	Max.	Unit
Viewing angle	2θ _{1/2}	115	-	-	Deg.
Forward Voltage (I _F =1400 mA)	V_{F}	37	39	43	V
Thermal Resistance Junction to Board (I _F =1400 mA)	Rθ _{J-B}	-	0.41	-	°C/W

Note:

Flux Characteristics, Order Code

CCT	CCT CRI		Typical FI	ux@1400mA	Order Code		
Range	Min	Туре	Flux(lm)	Flux(lm)			
			@85°C	@25°C			
2200K	70		6220	7080	CT90WCNCC9ASHDW060		
3000K	80		6500	7400	CT90WCMDC9ASHDW050		
	93	97	4760	5420	CT90WTAJC9ASHDW220		
4000K	80		6680	7600	CT90NCMDC9ASHDN040		
5000K	80		6940	7900	CT90CCMDC9ASHDC040		
	90	93	5930	6750	CT90CTAJC9ASHDC050		

Note:

- 1. It maintains a tolerance of ±10% on flux.
- 2. Flux values @ 85°C are calculated and for reference only.
- 3. It maintains a tolerance of ±2 on CRI.

Product Feature

- High efficiency
- Wide view angle
- Easy to be fixed
- No UV
- Long operating time

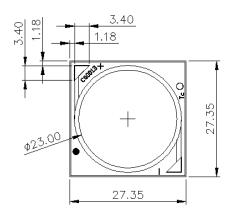

- High Brightness
- More energy efficient than incandescent and most halogen lamps
- Low thermal resistance
- Color uniformity

Application

 General Lighting application Bulb/Spot light

Precaution for Use

- 1. The chips should not be used directly in any type of fluid such as water, oil, organic solvent, etc.
- 2. When the LEDs are illuminating, the maximum ambient temperature should be first considered before operation.
- 3. LEDs must be stored in a clean environment. A sealed container with a nitrogen atmosphere is necessary if the storage period is over 3 months after shipping.
- 4. The LEDs must be used within 72 hrs after unpacked. Unused products must be repacked in an anti-electrostatic package, folded to close any opening and then stored in a dry and cool space.
- 5. The appearance and specifications of the products may be modified for improvement without further notice.
- 6. The LEDs are sensitive to the static electricity and surge. It is strongly recommended to use a grounded wrist band and anti-electrostatic glove when handling the LEDs.If a voltage over the absolute maximum rating is applied to LEDs, it will damage LEDs.Damaged LEDs will show some abnormal characteristics such as remarkable increase of leak current, lower turn-on voltage and getting unlit at low current.

Packing Model

<Figure 9 Tray packaging dimension>

<Figure 10 Packaging steps>

Notes:

- 1. All dimensions are in mm.
- 2. Normally, the maximum trays of a box are around 15 depend on products.
- 3. There are 2 inner boxes in a carton.

Handling of Silicone Resin LEDs

Handling Indications

During processing, mechanical stress on the surface should be minimized as much as possible.

Sharp objects of all types should not be used to pierce the sealing compound.

Figure 11

In general, LEDs should only be handled from the side. By the way ,this also applies to LEDs without a silicone sealant, since the surface can also become scratched.

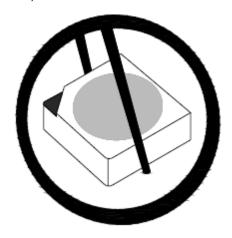

Figure 12

When populating boards in SMT production, there are basically no restrictions regarding the from of the pick and place nozzle, except that mechanical pressure on the surface of the resin must be prevented.

This is assured by choosing a pick and place nozzle which is large than LEDs reflector area.

Reflow Soldering

Recommend soldering paste specifications:

- 1. Operating temp.: Above 220 ^OC ,60 sec.
- 2. Peak temp.:260 ^OCMax.,10sec Max.
- 3. Reflow soldering should not be done more than two times.
- 4. Never attempt next process until the component is cooled down to room temperature after reflow.
- 5. The recommended reflow soldering profile (measured on the surface of the LED terminal) is as following:

Lead-free Solder Profile

Reworking

Rework should be completed within 5 seconds under 260 °C.

• Manual soldering (not recommended):

Soldering tin material: tin 6/4 alloy or contained Ag.

To prevent cracking, bake before manual soldering.

Temperature of iron tip: 300 °C±5 °C.

Soldering duration: 3sec±1sec.

Cleaning

Following are cleaning procedures after soldering:

- An alcohol-based solvent such as isopropyl alcohol (IPA) is recommended.
- Temperature x Time should be 50°C x 30sec. or <30°C x 3min
- Ultrasonic cleaning: < 15W/ bath; bath volume ≤ 1liter
- Curing: 100 °C max, <3min

Cautions of Pick and Place

- Avoid stress on the resin at elevated temperature.
- Avoid rubbing or scraping the resin by any object.
- Electric-static may cause damage to the component. Please ensure that the equipment is properly grounded. Use of an ionizer fan is recommended.

Storage

• It is recommended that products be stored under the following conditions:

Humidity: 60%R.H. maximum

Temperature: 5° C ~ 30° C (41° F ~ 86° F)

- Shelf life in sealed bag: 6 months at <40°C and <90%R.H.
- After opening the bag, devices that will be subjected to soldering or equivalent processing should be used within one year at a condition of ≤30°C / 60%R.H.
