

### 3W, 4:1wide input isolated & regulated single output

## **FEATURES**

- Ultra wide input voltage rang (4:1)
- High efficiency up to 83%
- Isolation voltage1.5KVDC
- Short circuit protection (automatic recovery)
- Operating temperature range:-40 $^{\circ}$ C ~ +85 $^{\circ}$ C
- Meet CISPR22/EN55022 CLASS A, without external components
- EN60950 approval

The PWB\_ZP-3WR2 Series are specially designed for applications where a wide range input voltage power supplies are isolated from the input power supply in a distributed power supply system on a circuit board.

- These products apply to where:
- 1) Input voltage range  $\leq 4$ :1;
- 2) 1.5KVDC input and output isolation;

3) Output regulated and low ripple noise is required.

## Selection Guide

|               | Part No.       | Input Voltage<br>(VDC) |       | Output                  |                                    | Efficiency                   | Max. Capacitive |
|---------------|----------------|------------------------|-------|-------------------------|------------------------------------|------------------------------|-----------------|
| Certification |                | Nominal<br>(Range)     | Max.* | Output Voltage<br>(VDC) | Output Current (mA)<br>(Max./Min.) | (%,Min./Typ.)<br>@ Full Load | Load<br>(µF)    |

# DC/DC Converter PWB\_ZP-3WR2 Series

# **MORNSUN**<sup>®</sup>

### Product Characteristic Curve

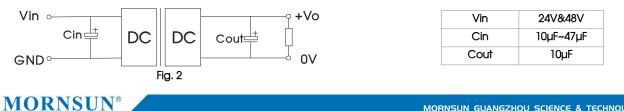

#### **Design Reference**

#### 1. Output load requirements

To ensure that the module can work efficiently and reliably, its output min. load shall be no lower than 5% of the rated load when using, or the output ripple may increase rapidly. Ensure that the product working load must be higher than 5% of the rated load.

#### 2. Typical application

All the DC/DC converters of this series are tested according to the recommended circuit (see Fig. 2) before delivery. If it is required to further reduce input and output ripple, properly increase the input & output of additional capacitors Cin and Cout or select capacitors of low equivalent impedance provided that the capacitance is no larger than the max. capacitive load of the product.

### 3. EMC solution-recommended circuit

Parameter description:

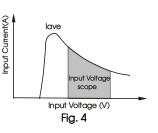

| Model | Vin:24V  | Vin:48V    |  |
|-------|--|------------|--|
| FUSE  | Slow blown fuses according to the actual input current selections of the clients |            |  |
| MOV   | S20K30   | S14K60     |  |
| C0    | 330µF/50V  | 330µF/100V |  |
| C1    | 4.7µF/50V  | 4.7µF/100V |  |
| LDM1  | 12µH   |            |  |
| C2    | 4.7µF/50∨  | 4.7µF/100∨ |  |
| C3    | 10µF   |            |  |
| CY1   | InF/2KV  |            |  |

Note: (1).Part (1) in the Fig. 3 is used for EMS test and part (2) for EMI filtering; selected based on needs. (2).If there is no recommended parameters, the model no require the external component.

#### 4. Input current

When the electricity is provided by the unstable power supply, please make sure that the range of the output voltage fluctuation and the ripple voltage of the power supply do not exceed the indicators of the modules. Input current of power supply should afford the flash startup current of this kind of DC/DC module(see Fig.4).

Generally: Vin=24V lave=640mA Vin=48V lave =316mA

Cannot use in parallel and hot swap 5.

#### Note:

- 1. Packing Information please refer to 'Product Packing Information'. Packing bag number: 58210008;
- 2. Recommend to use module with more than 5% load, if not, the ripple of the product may exceeds the specification, but does not affect the reliability of the product;
- 3. The max. capacitive load should be tested within the input voltage range and under full load conditions;
- 4. Unless otherwise specified, data in this datasheet should be tested under the conditions of Ta=25°C, humidity<75%RH when inputting nominal voltage and outputting rated load;
- 5. All index testing methods in this datasheet are based on our Company's corporate standards;
- 6. The performance indexes of the product models listed in this datasheet are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact our technicians for specific information;
- 7. We can provide product customization service;
- 8. Specifications of this product are subject to changes without prior notice.
