

single high speed RS485 isolation transceiver module(enhanced version)

#### FEATURES

- Baud rate high up to 500Kbps
- Connect up to 256 nodes on one bus
- 2500VDC isolation input and output
- Integrated high efficiency isolated DC/DC converter
- Operating temperature range: -40°C~+85°C
- ESD protection, perfect EMC recommend circuit

Single high rate RS485 isolation transceiver module TD301D485H-E/TD501D485H-E series are RS485 transceiver module with integrated isolated power, Signal isolated chip and the bus protection device.

Product's main function is to convert logic level to difference level of the RS485 agreement, and it implements the function of signal isolation. Products is with isolation power. It can achieve 2500 VDC electrical isolation and have the function of ESD protection. Product can be easily embedded user equipment, makes the equipment easily implement connection of RS485 protocol network.

#### **Application Precautions**

- 1. Please read the technical manual carefully before use; contact our technical support if you have any problem.
- 2. Do not use the product in hazardous areas.
- 3. Use DC power supply for the product and 220V AC power supply is prohibited.
- 4. Do not dismount and assemble the product without permission to avoid failure or malfunction of equipment.

#### After-sales service

- 1. Ex-factory inspection and quality control have been strictly conducted for the product; if there occurs abnormal operation or possibility of failure of internal module, please contact the local representative or our technical support.
- 2. The warranty period for the product is 3 years as calculated from the date of delivery. If any quality problem occurs under normal use within the warranty period, the product can be repaired or changed for free.

#### Applied circuit

See Application Notes for Isolated Transmitter for details.
