

Active high precision signal conditioning modules

RoHS

PART NUMBER SYSTEM

TxxxxP

TxxxxP Series signal conditioning modules (also called isolated transmitter), are the analog signal isolated modules with preceding current/voltage signal input and post current/voltage signal output. With an embedded high-efficient micro-power supply, the product supplies power to the internal signal processing circuit and inputs a line of isolated power to the preceding-stage transducer at the same time. The electromagnetism isolated technology of the product features that the input, output, power supply, power distribution are isolated from each other, which can completely replace the traditional linear optocoupler isolation, also, it has superior temperature-coefficient characteristics, linearity and precision. TxxxxP Series are widely applied in PLC, DCS, MCU and other signal isolation & conversion.

FEATURES

- Four-port isolation (signal input, signal output, power input and isolation power output are mutually isolated)
- High accuracy (0.1% F.S.)
- Isolation voltage: 2.5KVDC/60s
- Low temperature coefficient (50PPM/°C, within -40°C ~ +85°C)
- Industrial grade operating temperature: -40°C ~ +85°C
- Low ripple & noise: ≤30mVp-p
- ESD protection (IEC/EN61000-4-2 Contact ±4KV perf. Criteria B)

Application Precautions

1. Please read the instructions carefully before use; contact our technical directly if you have any problem.
2. Do not use the product in hazardous areas.
3. use DC power supply for the product and 220V AC power supply is prohibited.
4. Do not dismantle and assemble the product without permission to avoid failure or malfunction of equipment.
5. Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75% with power input nominal voltage and rated signal output full load.

After-sales service

1. Ex-factory inspection and quality control have been strictly conducted for the product; if there occurs abnormal operation or possibility of failure of internal module, please contact the local representative or our technical support.
2. The warranty period for the product is 3 years as calculated from the date of delivery. If any quality problem occurs under normal use within the warranty period, the product can be repaired or changed for free.

Applied circuit

Please refer to Isolated Transmitter application notes.

Design Reference

1. Wiring diagram for product application

- Notes :
- ① Pins 13, 14 and 15 are NC pins in case of no isolation power output.
 - ② In case of positive and negative isolation power output, Pin 13 is isolation power output negative, Pin 14 is isolation power output positive, Pin 15 reference ground.
 - ③ In case of single isolation power output, Pin 13 is isolation power output negative, Pin 14 is isolation power output positive, Pin 15 is NC.

2. EMC solution-recommended circuit
