3W/5W, AC-DC converter

FEATURES

- Universal 85 264VAC and wide 100 370VDC Input
- ullet Operating ambient temperature range -40 $^\circ$ C to +70 $^\circ$ C
- High I/O isolation test voltage up to 4000VAC
- Regulated output, Low ripple & noise
- Output short circuit, overcurrent, overvoltage protection
- High efficiency, high reliability
- Plastic case meets flammability per UL94V-0
- EMC compliant to CISPR32 / EN55032 CLASS B
- IEC/EN/UL62368 approval

LDE03/05-20BxxW Series is one of Mornsun's compact size power converters. It features universal AC Input and at the same time accepts DC Input voltage, low power consumption, high efficiency and double or reinforced insulation. For extremely harsh EMC environment, we recommend using the application circuit show in Design Reference of this datasheet.

Product Characteristic Curve

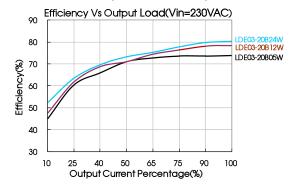

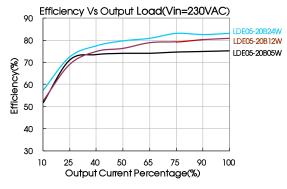

Note: ① With an AC input between 85-100VAC and a DC input between 100-120VDC, the output power must be derated as per temperature derating curves;
② This product is suitable for applications using natural air cooling; for applications in closed environment please consult factory or one of our FAE.

Output Filter Components:

We recommend using an electrolytic capacitor with high frequency, and low ESR rating for C2 (refer to manufacture's datasheet). Choose a Capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C1 is a ceramic capacitor used for filtering high-frequency noise and TVS is a recommended suppressor diode to protect the application in case of a converter failure. For additional protection an external input MOV, i.e. S14K350 is also recommended.
