

## 3M™ Electrically Conductive Connector Covers 4270 Series

### Conductive Composite

Connector Covers 4270 Series are permanently volume conductive and free of carbon black particulate. The Connector Covers 4270 Series do not leave black marks and are more suited to clean situations. Meets the requirements of NASM5501 31/32.

### Noncorrosive

Connector Covers 4270 Series are noncorrosive and produce no visible corrosion when tested to Federal Test Method 101C using Kovar test plates.

### Conformability

The material used in the covers were also selected for its resilience. Properly sized, the covers provide a snug, secure fit. This helps keep connectors clean and prevents the cover from accidentally falling off.
